Dinosaur skeleton set to sell for £1m

Your weekly round up of the funny, wonderful and strange news from across the globe!

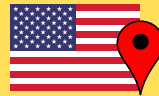

AUSTRALIA

New crab discovered - and it wears a hat

A dinosaur skeleton is set to sell for £1million at auction. Dinosaur remains rarely come up for sale, but this one will be sold on 20th October in France. The Camptosaurus skeleton was discovered in Wyoming, USA, around 30 years ago and is called Barry, after the palaeontologist that restored it. Barry dates back around 150 million years to the late Jurassic period. Camptosaurus' were herbivores with long faces and beaks, the name means 'flexible lizard.'

A fluffy crab that wears a sponge hat has been discovered off the coast of Australia. The new species has been named the 'Lamarckdromia beagle' after the ship that carried Charles Darwin around the world. Crustaceans of this kind use sea sponges for protection, wearing them like hats! A family living in Denmark, Western Australia, found the creature washed up on the beach and sent it to a museum for identification..

USA

No record too big, no pup too small

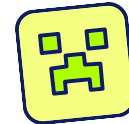

Last weekend saw 219 dogs attend a movie screening and break a Guinness World Record. The dogs sat down and watched the new Paw Patrol movie, breaking the world record for 'most dogs attending a film screening.'

ENGLAND

Unicorn crash landing

A man from Nottinghamshire, England, has landed on an inflatable unicorn after a skydive. Jan Zackl, attempted the daring stunt at the annual skydiving festival in Langar. Jan said that the challenge was a lot harder than it looked and required years of training. He is part of a team of people who attempted the jump, but Jan was the only one to make the unicorn landing successfully.

Go green with Minecraft

Minecraft has launched new plans to help children learn about green energy. Players will be encouraged to design and create a windfarm, as well as look after marine wildlife in two new worlds. Minecraft says it wants people to learn more about living sustainably and building communities. The project is being run by The Crown Estate, which looks after the monarchy's lands. One of the new worlds is Great Windsor Park, which is home to lots of different species of wildlife.
